WHAT!

The Covering Solution* is the installation methodology of a new shingle over the existing roof materials without removal. You can aesthetically refresh your roof with reasonable budget in a short construction period. It is the way to extend the functional lifespan of your roof. It enhances sure weathering performance by re-installation of the underlayment together, which is not comparable with just the painting.

* Regarding the availability of the covering solution, it is necessary to check the existing deck and other conditions, so please consult with the contractor.

WHY!

Your roof is getting worn out as time goes on. It's natural change by aging and weathering. If you leave it as it is, the roof can damage of your properties by water leakage after heavy rainfall. It is important to take precautions before the damages to the roof deck.

HOW!

Check the roof structure first whether it's safe enough or not. If the roof deck is the wooden in generally acceptable condition, just clean the existing roof finishing and install the new shingle on it with nailing after underlayment application.

The benefits you can get from
Covering Solution using Oakridge® Super

1. High durability

Blown asphalt and fiberglass mat which are the main components of the shingle perform the sure protection from heavy raining. Waterproofing is the highest functional requirement for the roofing materials.

2. Weatherability

Owens Corning blends mineral coated granules, which help resist algae growth, into our colorful granules in a way that is proprietary to us and is scientifically developed to protect the roof from severe weathering environment.

3. Cost savings

It is undoubtedly less expensive than a complete roof replacement. Also, as it lasts longer than painting you will save the maintenance cost.

Make your roof more beautiful and stronger to protect your precious property, your home. Why don't you select Covering Solution for re-roofing by Oakridge® Super which can manage easier and faster the roofing renovation?
